CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Group's business can be broadly categorised into four main sectors: (i) asset advisory services and asset appraisal; (ii) corporate services and consultancy; (iii) media advertising; and (iv) financial services.

Asset Advisory Services and Asset Appraisal

Asset advisory services and asset appraisal are the core business of the Group, which typically involve provision of independent valuation services to a number of listed groups to meet market, regulatory and fiduciary requirements, sourcing and identifying potential investment opportunities or investors, undertaking due diligence and evaluation on the underlying assets and provision of procedural and strategic business advices. Asset advisory services income is primarily success-based and project-based nature.

Corporate Services and Consultancy

The corporate services and consultancy segment mainly focuses on provision of advice to corporations in areas such as corporate governance, internal control, enterprise risk management and other operational aspects as well as provision of back office administration.

Media Advertising

Media advertising income is generated mainly through its in-elevator poster frames network and liquid-crystal-display network inside the elevators or lift lobbies of middle to high-end residential community.

Financial Services

The financial services segment mainly represents the provision of services relating to the dealing in securities via a licensed corporation under the Securities and Futures Ordinance, Chapter 571 of the laws of Hong Kong (the "SFO") via an indirect subsidiary and provision of money lending services.

The provision of services relating to the dealing in securities mainly involves provision of Type 1 (dealing in securities) regulated activity and services under the SFO while the money lending business mainly involves provision of financial credit services such as personal loans and commercial loans to individuals and corporations.

In view of the unstable economic outlook of Hong Kong and evaluation of the current businesses of the Group, it will be difficult for the Group's type 1 licensed corporation to achieve growth without commitment of significant working capital, the Group has entered into a sale and purchase agreement to dispose the licensed corporation, which was subsequently terminated. For details, please refer to the Company's announcements dated 18 March 2020 and 15 April 2020. The Group is currently in negotiation with some potential buyers.

FINANCIAL REVIEW

The Group's cost of sales for the Period was approximately HK\$6.7 million (six months ended 30 September 2019: HK\$9.7 million), representing a decrease of approximately 31.3% from that of the Last Corresponding Period. The decrease in cost of sales was main attributable to the decrease in revenue and cost control measures implemented during the Period.

The Group's marketing and administrative expenses for the Period were approximately HK\$17.8 million (six months ended 30 September 2019: HK\$31.1 million), representing a decrease of approximately 42.8% from those of the Last Corresponding Period. The decrease in such expenses was due to the implementation of cost control measures during the Period.

Accordingly, the profit attributable to owners of the Company for the Period was approximately HK\$3.8 million (six months ended 30 September 2019: loss of HK\$42.1 million). The gain was mainly attributable to (1) the one-off non-cash expenses for share-based payments of approximately HK\$9.0 million during the Last Corresponding Period; and (2) turnaround from the total net fair value loss on financial assets at FVTPL of approximately HK\$26.0 million for the Last Corresponding Period to total net fair value gain on financial assets at FVTPL of approximately HK\$5.1 million for the Period.
